

# Milk Receiver Systems

Receiver Groups available in 18" & 26" diameters with Vertical or Horizontal Stainless Steel Traps.

## Quality

E-Zee NuPulse uses only the best grade **304** stainless steel available. Milk pumps are hand-crafted to precision tolerances. Milk pump motors are totally enclosed, fan cooled, 220 volt. Constant and variable speed milk pump controls are mounted in water-tight enclosures. This type of quality results in years of trouble free, dependable service.

## Milk Receiver Systems

### Flexibility

Milk and vacuum inlets can be up to 4" in diameter and can be positioned in the pot as required. Sanitary traps are available in vertical and horizontal models with inlets up to 4" diameter. Standard and variable speed milk pump controls are used. Low profile receivers are also available for swing style parlors.

Horizontal Trap

Jumbo Milk Filter

Variable Speed Milk Pump Control

### Efficiency

In any Milking System, the receiver group is the link between the vacuum pump and the milk lines. In order for the milker units to work their best, air flow through the system must be smooth and of adequate capacity. E-Zee NuPulse receiver groups offer sizing to meet capacity requirements and are designed with minimal restrictions for air flow.
